

Industry Perspectives on European Wind Build-out

Anna Wachtmeister
Vice President, Sales North & West Onshore

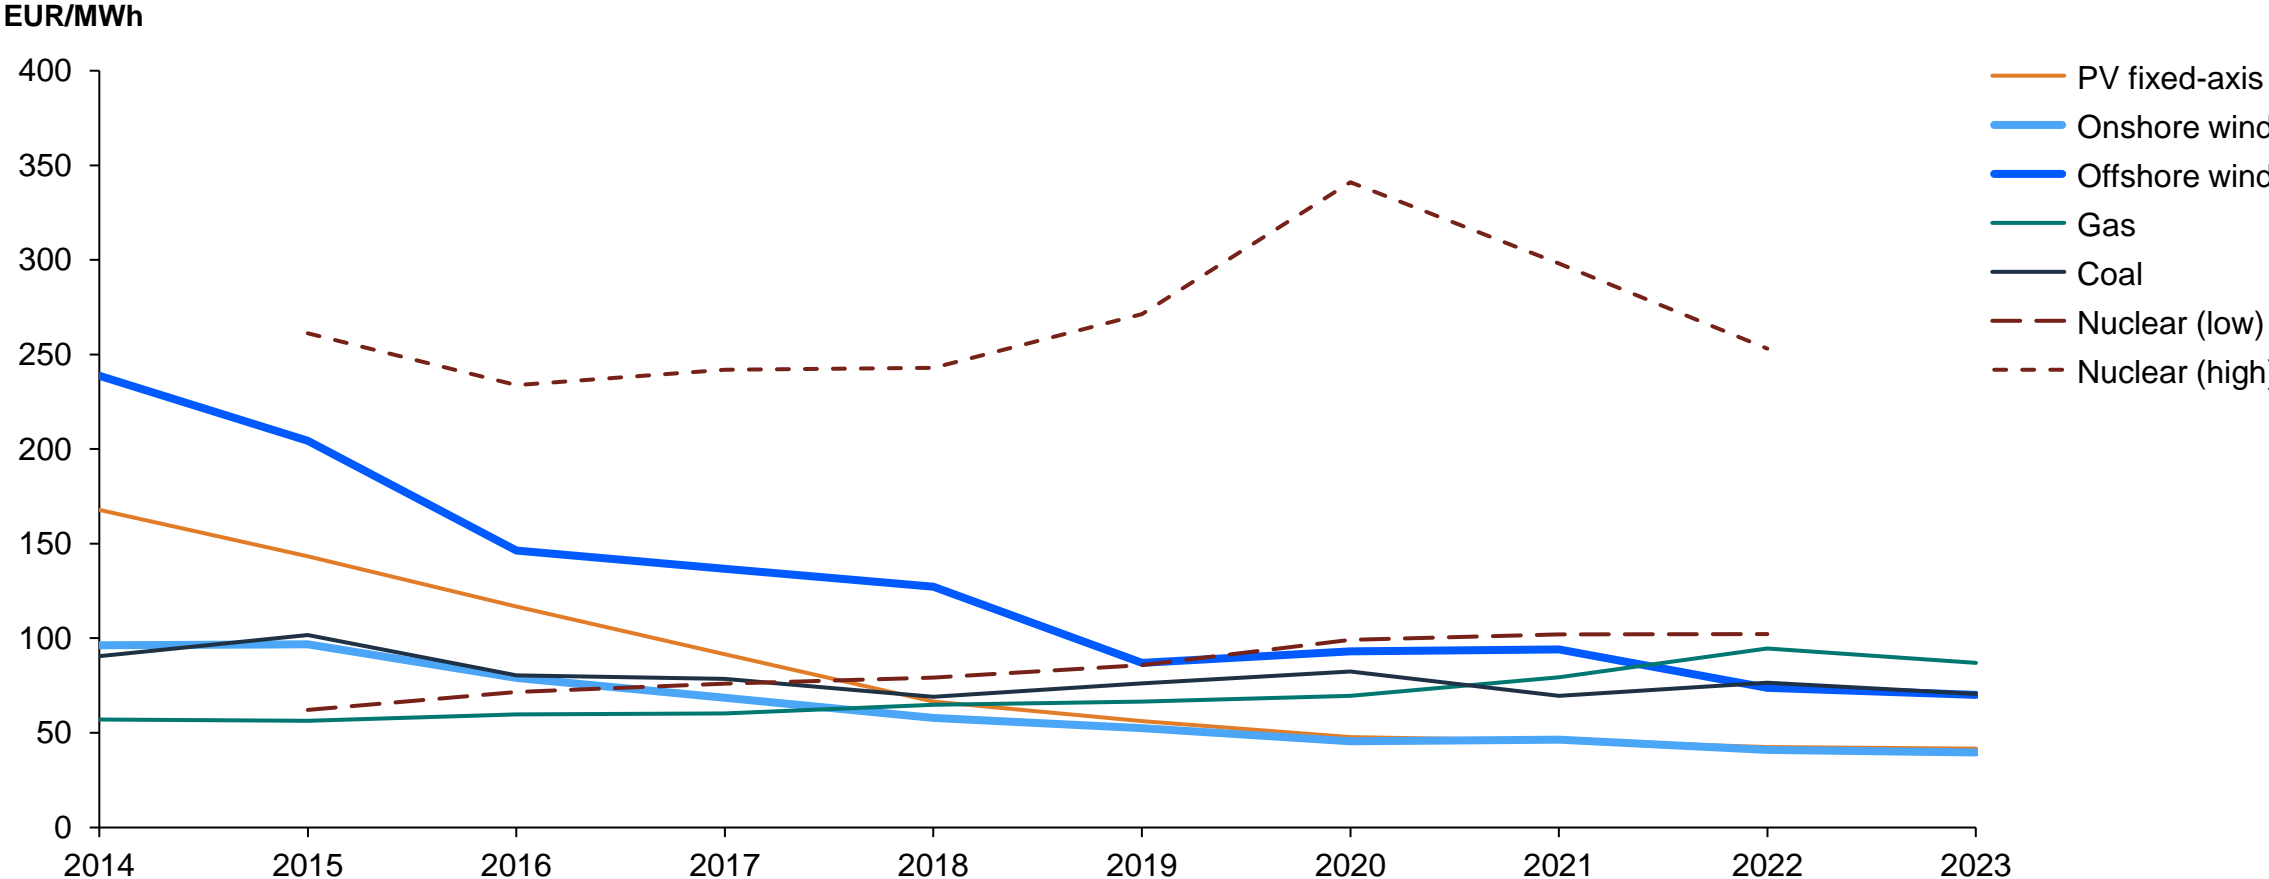

An **unprecedented** build out of renewables is needed to reach net zero

Global wind generation capacity scenarios

Wind energy is the **cost competitive** energy source for a green energy system

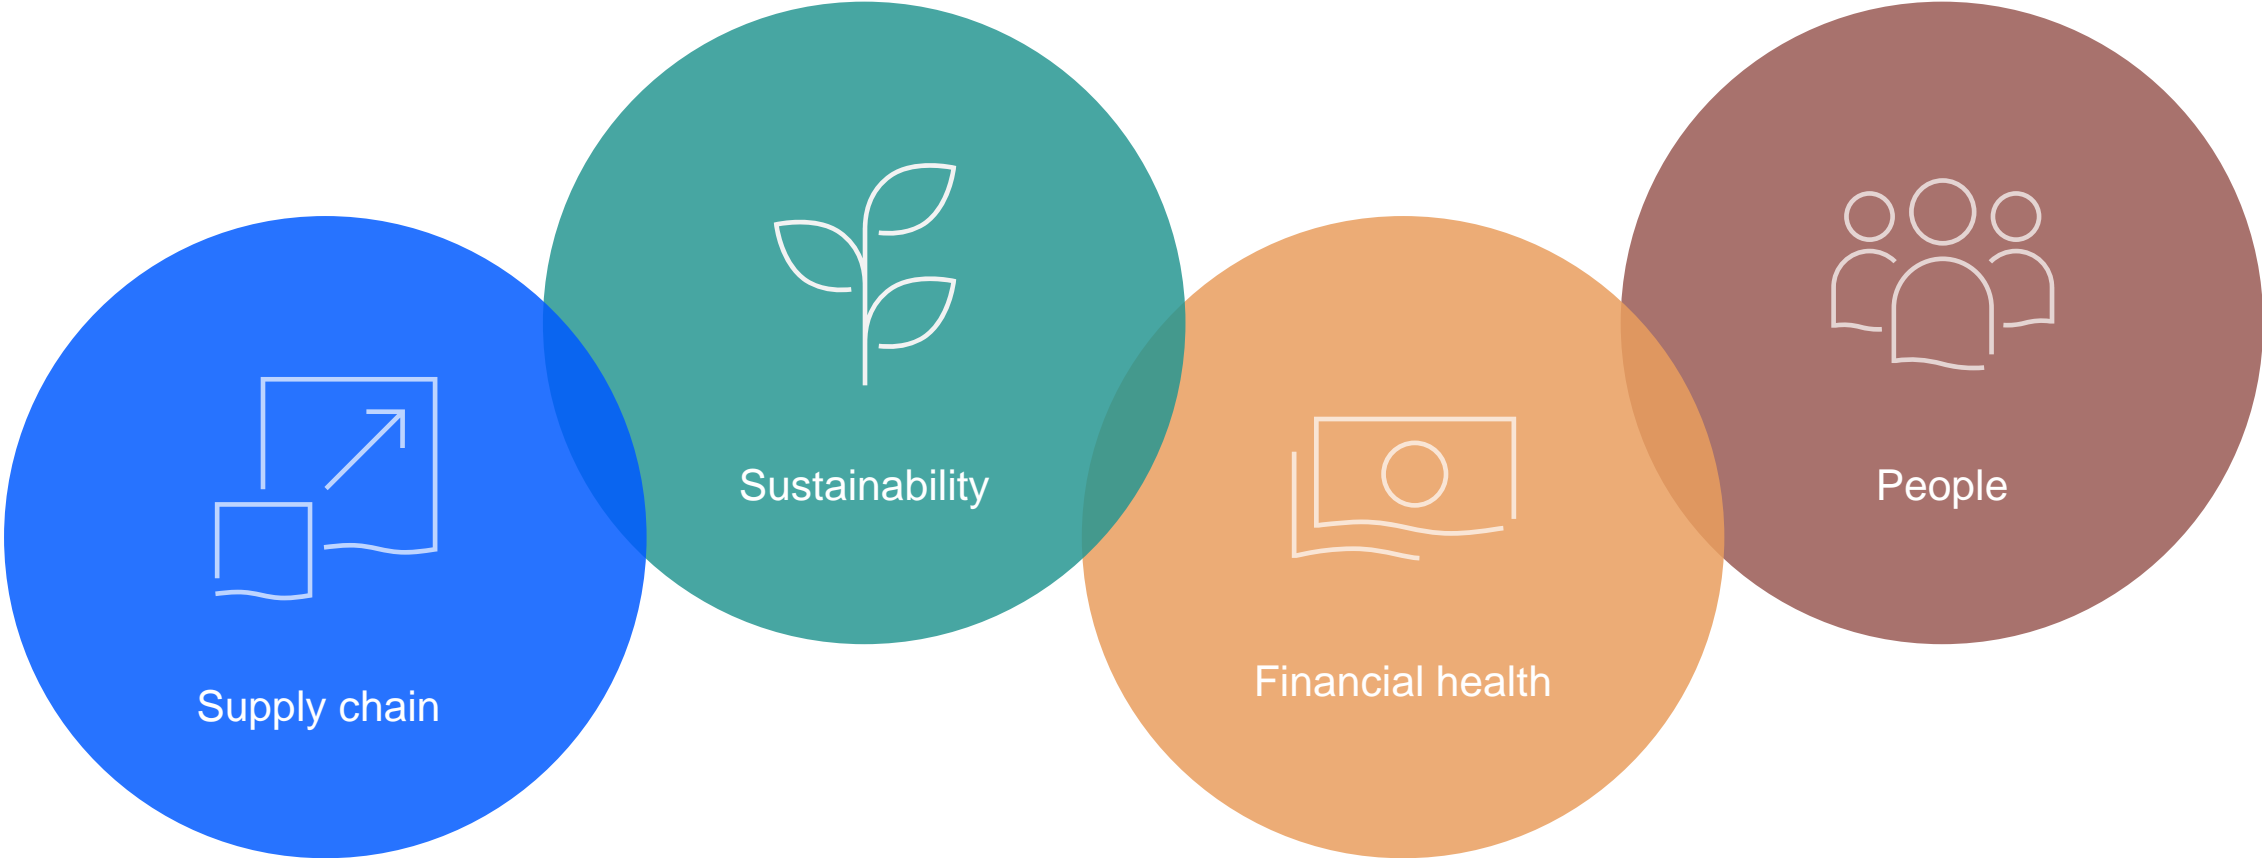

LCOE global benchmarks

Source: BNEF; Notes: *Global nuclear LOCE is shown excl. China converted from USD 2022 rates (BNEF doesn't provide benchmark LCOE for nuclear).

Succeeding with a sustainable energy transition

Key enablers for building a sustainable industry

Vestas in Finland

Our contribution and commitment to the market

Vestas spend*

350 mEUR
(2019-2023)

Local jobs

+200 FTEs

Installed turbines

+800 WTGs

No. of suppliers

+200
(2019-2023)

CO2e avoided

+1 mil.
tonnes/year

*Procurement from suppliers in Finland 2019 to 2023

Thank you
